New riser recliner chairs offering
superior comfort and support in style

To achieve the full recline position, the chair only needs to be 90 mm away from the wall.

Manual version
Black vinyl

Modern and comfortable: the simplest of all

Functional and with minimalist lines, the **Faro** chair can be easily adapted to all environments. The **built-in headrest** offers **optimised positioning**, providing a **superb level of comfort** for the user.

Available in two models

The **Faro** chair is available in an electric version with a single motor, allowing **legrest elevation** and a **relaxing recliner position**. The riser function gently **elevates** the user out of the chair and onto their feet. The **Faro** chair is also available as a manual version, allowing for a comfortable recline position. To obtain this position the user just has to gently lean against the back and armrests. Both versions have back castors.

Invacare® *Douro*

> To achieve the full recline position, the chair only needs to be 100 mm away from the wall.

Elegance and comfort meet again!

The *Douro* riser recliner chair offers **additional comfort** thanks to the synergy between the seat and the legrest. It also benefits from additional **trunk support** to ensure a **good seating position**. With a clean design and four colours to choose from, this chair can be easily adapted to homecare environments.

Different versions available

The *Douro* chair is available in an electric version with a single motor, allowing the lift of the legrest followed by the **backrest reclination**. The riser function gently **elevates** the user out of the chair and onto their feet. *Douro* is also available as a manual version which has a recline function, obtained by gently leaning against the back and armrests. Both versions have back castors.

To achieve the full recline position, the chair only needs to be 50 mm away from the wall.

Compact and classic design

The new design of the *Invacare **Porto*** chair offers even more **comfort** thanks to the **integral legrest and trunk support**. Its small dimensions and range of fabric options allows it to easily fit into many homecare environments.

Different versions available

The ***Porto*** chair is available in an electric version with a single motor, allowing **legrest elevation** followed by **backrest recline**. The riser function gently **elevates** the user out of the chair and onto their feet. It is now also available with two motors, allowing the backrest adjustment to be independent from the legrest adjustment for a **lying position**. All versions have back castors.
